SRIKAAVYAA T

Java Full Stack Developer

tsrikaavyaa@gmail.com +91 9176822409 linkedin.com/in/srikaavyaa-thamizh github.com/Srikaavyaathamizh

PROFESSIONAL SUMMARY

Aspiring Java Full Stack Developer pursuing B.Tech in Artificial Intelligence & Data Science at Saveetha Engineering College with strong knowledge of Java, Spring Boot, Object-Oriented Programming, RESTful API development, SQL, and Web Technologies. Passionate about building scalable backend applications, designing responsive web interfaces, and solving real-world problems through clean, maintainable code. Strong problem-solving skills with hands-on experience in full-stack web development, database management, and version control using Git.

EDUCATION

B.Tech in Artificial Intelligence and Data Science 2023 – Present
Saveetha Engineering College
Current CGPA: 8.3/10

TECHNICAL SKILLS

Programming: Java, Python.
Core Java: OOP Concepts, Exception Handling, Collections Framework, Multithreading, File Handling, Generics, JDBC.
Backend Development: Spring Boot, REST API Development, Maven, JSON.
Frontend Development: HTML5, CSS3, JavaScript, Responsive UI Design .
Databases: MySQL, Database Design .
Tools & Platforms: Postman, IntelliJ IDEA, VS Code, Eclipse, Git, GitHub, Render, Figma, Canva .
Additional Skills: Problem Solving
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, DBMS, Operating Systems, Computer Networks, Software Engineering.

PROFESSIONAL EXPERIENCE

ServiceNow Hackathon (Virtual) 01/2025
- Designed and implemented automated workflow solutions using ServiceNow modules, completing 5+ problem-solving tasks within a competitive virtual environment.
- Applied workflow automation concepts to streamline simulated business processes, reducing manual task steps by an estimated 30%.

Inplant 06/2024
Trios Technology, Cyber Security Department
- Completed intensive training in Java development, cybersecurity fundamentals, and secure coding practices across 20+ hours of hands-on sessions.
- Applied secure coding principles to review and improve Java code samples, identifying and documenting 10+ common vulnerabilities such as SQL injection and XSS.

PROJECTS

CraveAI — Food Recommendation System 2024
Flask, Python, Pandas, CSV, HTML, CSS
- Built a data-driven web application that recommends personalized food items from a dataset of 200+ menu entries based on user taste preferences.
- Developed separate vendor and customer modules, enabling vendors to list products and customers to receive tailored recommendations with 90%+ relevance accuracy.
- Processed and filtered CSV-based food data using Pandas, reducing recommendation response time to under 2 seconds.

SRISARA — Fashion E-Commerce Website 2026
HTML, CSS, javascript
- Developed a fully responsive fashion e-commerce website featuring a catalog of 100+ product listings with real-time search and dynamic filtering.
- Implemented client-side cart and product filtering logic using vanilla JavaScript, reducing page reload time to near-zero for filtering actions.

MedAssist – Smart Medicine Reminder & Healthcare Management System 2025
Flask, Python, MySQL, HTML, CSS, JavaScript
- Built a full-stack healthcare platform enabling users to manage 5+ medicine schedules, track upcoming appointments, and store medical records in a secure MySQL database.
- Implemented user authentication with session management and ole-based access, reducing unauthorized access risk.
- Integrated automated medicine reminder logic, improving medication adherence for simulated patient profiles by 100% vs manual tracking.

CERTIFICATIONS

- Java Training Completion
- Google Cloud Career Launchpad — Cloud Engineer Track
- Microsoft AI Learning — Machine Learning Concepts
- Microsoft Azure Fundamentals — Cloud & AI Basics
- Applied AI Fundamentals
